

# Paige Pearson Data Analyst Portfolio

# Who am I? ..

As a data analyst with a background spanning education, tourism, and retail, I incorporate my diverse experiences to adapt with every new project. My time state-side and abroad has helped me balance the nuanced challenges of cross-cultural communication while maintaining my work ethic and decisiveness.

Proficient with tools such as SQL, Python, Tableau, and MS Excel, I identify patterns, craft data-driven stories, and ensure precise documentation in my work. My experiences have not only refined my thoroughness and organizational skills, but has also molded me into a resourceful analyst, ever eager to bring clarity to multifaceted data landscapes.

# Projects ..

[1: Leveraging data analysis to strategize regional marketing initiative](#)

[2: Optimizing resource allocation based on demand forecasts](#)

[3: Crafting novel business strategy for online distribution](#)

[4: Customer profiling and sales pattern segmentation](#)

[5: Examining influencing factors of online traffic](#)

# Project #1: Leveraging Data Analysis to Strategize Regional Marketing Initiative

---

## Objective .

Aid the marketing team to make a more accurate budget.

## Skills .

- Data Cleaning
- Descriptive Statistics
- Data Visualization
- Presenting Findings to Stakeholders

## Tools .

MS Excel

MS PowerPoint

# Research Methodology ..

## Exploratory Data Analysis

- Examine the data's structure and variables
- Identify the data source and collection methods

## Cleaning Data

- Handle missing values, duplicates, and inconsistencies
- Ensure data consistency, quality, and integrity

## Data Preparation

- Aggregate data as needed for analysis
- Create subsets or groupings for specific analysis

## Descriptive Statistics

- Calculate and log basic statistics
- Gain an overview of data distribution

## Presenting to Stakeholders

- Share insights and visualizations to relevant stakeholders
- Address questions and provide clarifications

## Creating Presentation

- Generate charts and graphs to visually represent data
- Prepare a structured presentation to communicate findings

## Analysis and First Insights

- Form observations based on EDA and descriptive statistics
- Identify potential patterns and investigate data as needed

### Global Sales by Region

# Findings ..

### Percentage of Global Sales by Region

Sales have not remained the same over time. A region-focused approach to resource distribution is recommended.

# Project #2: Optimizing Resource Allocation Based on Demand Forecasts

---

## Objective

Reduce waste and increase efficiency within a staffing agency through resource optimization.

## Skills

- Data Dashboard
- Data Cleaning/Wrangling
- Data Integration
- Statistical Hypothesis Testing
- Forecasting with Seasonality
- Video Presentation to Stakeholders

## Tools

MS Excel

Tableau

QuickTime Player

iMovie

# Research Methodology ..

## Business Requirements

- Understand objectives and deliverables of the project to guide analysis

## Sourcing Data

- Create a data wish list
- Decide which data to use that meets the projects needs

## Cleaning/ Wrangling Data

- Prepare the data for analysis by handling any issues
- Integrate the datasets and document the process

## Data Profiling

- Generate a profile of the cleaned data to understand it's characteristics

## Finalize Project Deliverables

- Prepare a video presentation to present findings to stakeholders
- Follow up on any questions following the project via email

## Visualizations

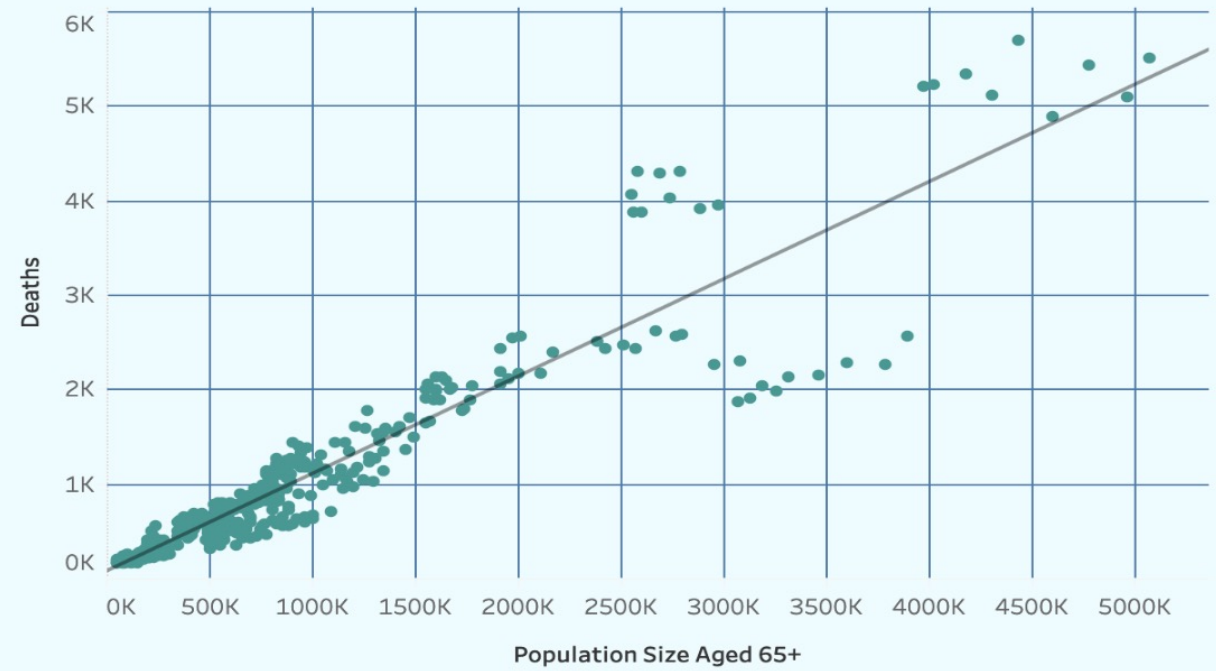

- Create interactive charts to highlight aspects of the project
- Craft a dashboard to tell a story with the data

## Statistical Analysis

- Calculate descriptive statistics
- Perform statistical hypothesis tests to validate or refute initial hypothesis

Correlation between Influenza Deaths and Age

# Findings ..

A tailored approach to staffing allocation was created to fit the needs of all types of communities across the US.

# Project #3: Crafting Novel Business Strategy for Online Distribution

---

## Objective

Examine sales data to assess the current state of the company and develop a strategy to grow the customer base and market share.

## Skills

- Data Dictionary
- Entity Relational Diagram
- Common Table Expressions, Joins, and Subqueries in SQL
- Data Dashboard

## Tools

MS Excel

MS PowerPoint

PostgreSQL

Tableau

# Research Methodology ..

## Business Requirements

- Gain a clear understanding of the requirements, objectives, and project deliverables.

## Explore Data

- Familiarize oneself with the database's structure, variables, and content
- Generate descriptive statistical data

## ERD and Data Dictionary

- Visualize relationships with an Entity Relational Diagram
- Document the attributes of each data field for reference

## Answering Questions

- Use the provided business questions to define the scope of the analysis and use it as a launch point for further insights

## Project Deliverables

- Finalize all parts of the deliverables and send to client – A Data Dictionary, Presentation, and SQL Data Report

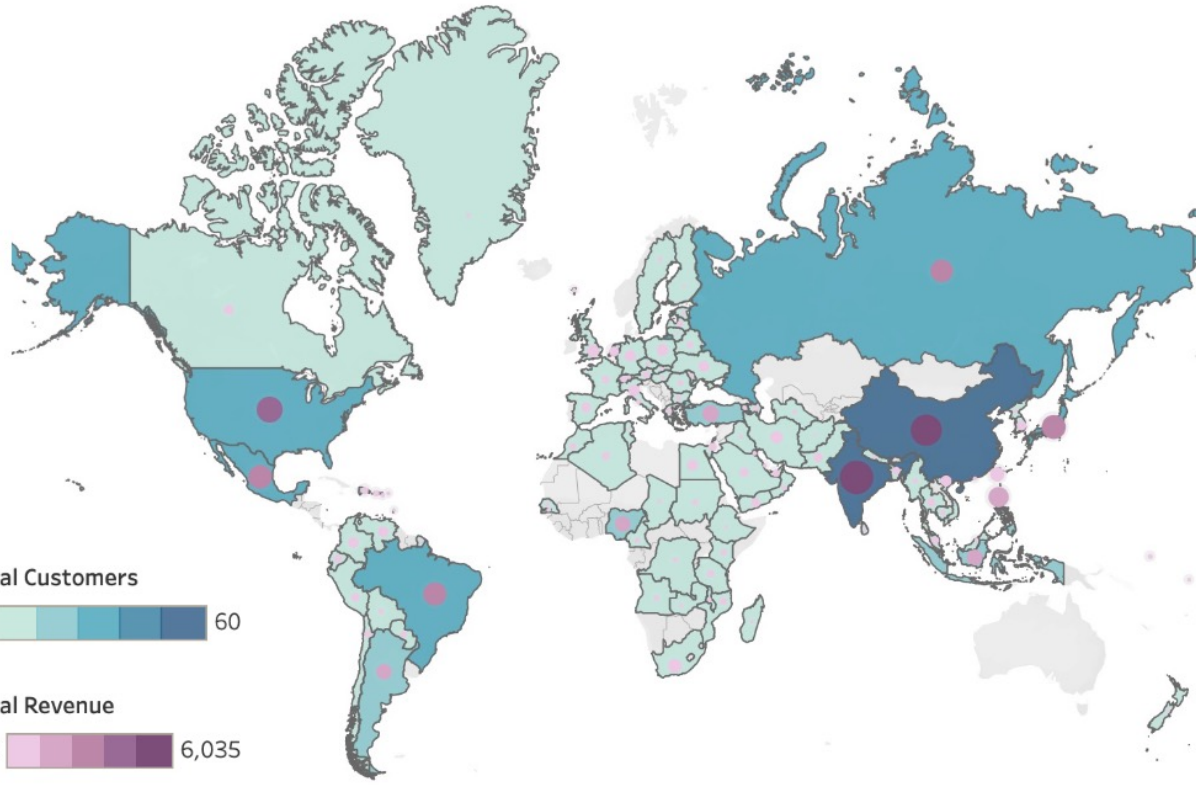

## Charting a Narrative

- Generate charts and graphs to visually represent data
- Prepare a structured presentation to communicate findings

## Diving into Insights

- Extend analysis to explore additional insights or patterns that could benefit the company

# Findings ..

Countries are divided into organized groups to allow the marketing and sales teams to focus their efforts as needs change.

Saint-Denis Runion 211.55	Apeldoorn Netherlands 191.62	London United Kingdom 174.54	Memphis United States 167.67
Cape Coral United States 208.58	Molodetno Belarus 189.60	Richmond Hill Canada 167.62	
Santa Brbara dOeste Brazil 194.61	Qomsheh Iran 183.63	Tanza Philippines 166.61

# Project #4: Customer Profiling and Sales Pattern Segmentation

---

## Objective .

Understand customer base in order to design strategies to retain and build brand loyalty.

## Skills .

- Data Cleaning
- Data Wrangling
- Statistical Analysis
- Data Flags and Merging
- Grouping and Aggregating Data
- Interim Report

## Tools .

MS Excel

Python

# Research Methodology ..

## Exploring the Data

- Examine the data's structure and variables

## Consistency Checks

- Handle missing values, duplicates, and inconsistencies
- Ensure data consistency, quality, and integrity

## Merging Datasets

- Merge sales data and customer data together using Python
- Use previous checks to ensure data quality

## Grouping and Aggregating

- Calculate and log basic statistics
- Create new variables and groupings to begin analysis

## Interim Report

- Finalize interim report with all information organized and easily accessible

## Visualizations

- Use Python to create charts and graphs to visually represent the data and bolster customer profile findings

## Customer Profiles

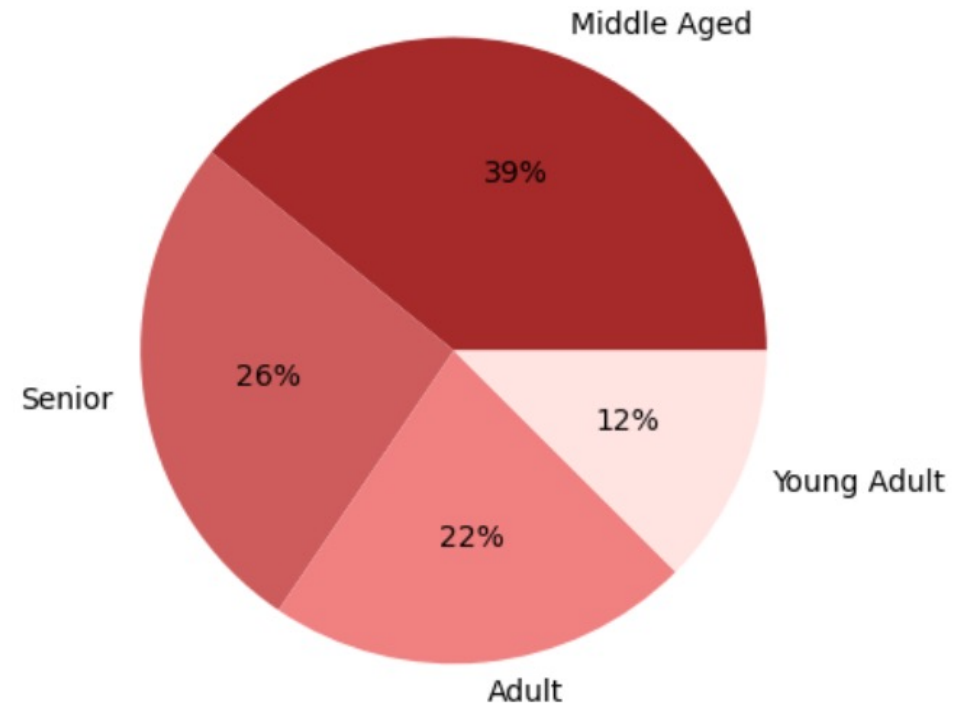

- Use data flags to build profiles around different variables
- Gain insight into the different types of customers

### Total Orders by Hour

# Findings ..

### Customer Age Profile

The Marketing and Sales teams were sent results on customer profiles to develop better segmentation and tailor new strategies going forward.

# Project #5: Examining Influencing Factors in Online Traffic

---

## Objective .

Determine which products draw more online traffic and why to inform client's upcoming marketing strategies.

## Skills .

- Data Cleaning
- Descriptive Statistics
- Data Visualization
- Cluster Analysis
- Regression Analysis
- Data Dashboard

## Tools .

MS Excel

MS PowerPoint

Python

Tableau

# Research Methodology ..

## Sourcing Data

- Identify the data source and collection methods

## Exploring the Data

- Examine the data's structure and variables
- Identify any limitations to the data

## Cleaning the Data

- Handle missing values, duplicates, and inconsistencies
- Create subsets or groupings for specific analysis

## Initial Analysis

- Calculate and log basic statistics
- Gain an overview of data distribution

## Presenting to Stakeholders

- Share insights and visualizations to relevant stakeholders
- Address questions and provide clarifications

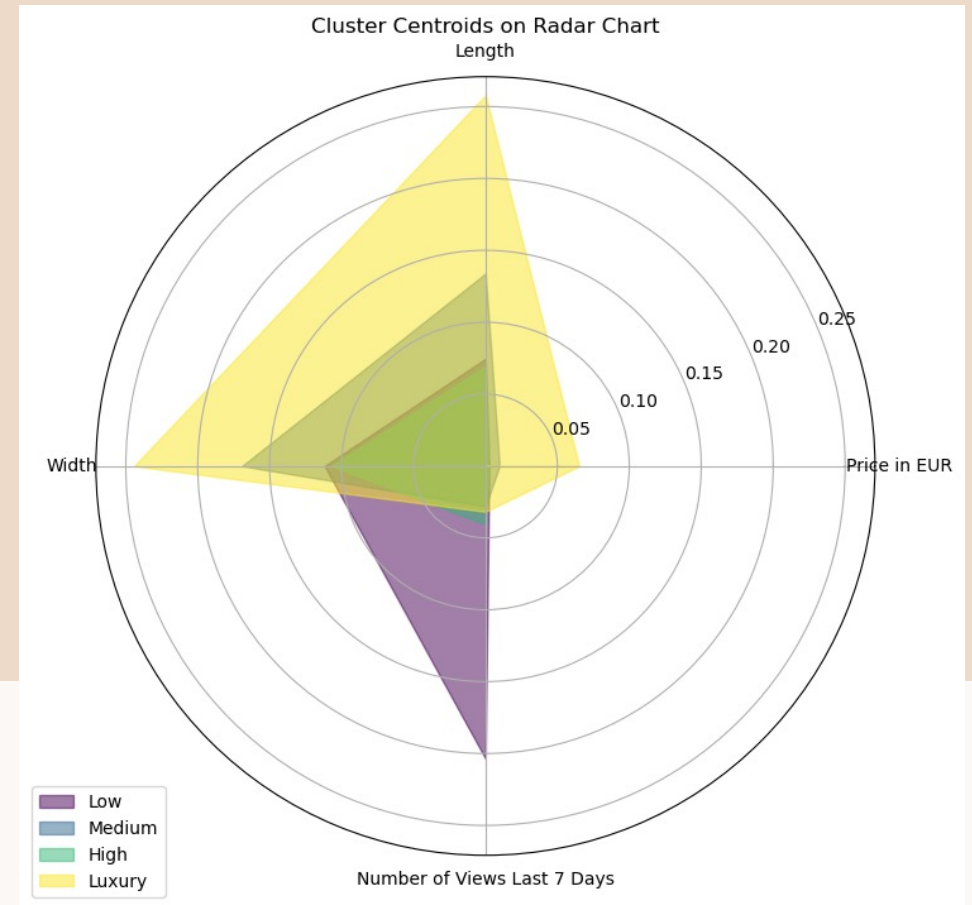

## Creating Dashboard

- Generate charts and graphs to visually represent data
- Prepare a structured presentation to communicate findings

## Cluster Analysis

- Identify potential patterns and investigate data as needed
- Examine how variables shift within clusters

# Findings ..

Client was sent results on product profiles to develop better segmentation and tailor new strategies going forward.
